

WEBINAR

TOPIC

THE "DESIGN FOR CHANGE METHODOLOGY"

In 45 minutes you will discover how to generate the necessary conditions to awaken the spark in the classroom or significant learning space using the DFC Methodology. From this competency-based approach, you will learn techniques for your students or group of young people to develop skills such as empathy, creativity, teamwork, critical thinking, communication, problem-solving or adaptation to change, and you will be able to ask them directly your questions about how to apply the DFC Methodology based on Design Thinking to achieve a change of mentality.

SPEAKERS

MIGUEL LUENGO
PRESIDENT OF DESIGN FOR CHANGE SPAIN

LAURA PLAZA
EUROPEAN PROJECT MANAGER
