IN-HABIT GENERAL ASSEMBLY

LUCCA

NITRA

RIGA

CORDOBA

On the 11th and 12th of September, the **INclusive Health and wellBeing in small and medium size cITies Horizon 2020 project met for its 2nd General Assembly of 2023**. The location chosen for this occasion was **Nitra**, one of the four pilot cities involved in the project.

THE GENERAL ASSEMBLY

The General Assembly provided the opportunity for the **teams from the four pilot cities, as well as all the project partners, to meet up in person** to discuss the project's progress and challenges, follow up on clustering activities, and make decisions on organisational and managerial issues related to the IN-HABIT project.

THE SITE VISIT

The meeting was followed by a **site visit around the city of Nitra on the 13 th and 14 th of September**, completing the set of city site visits which began in the previous months and involved a visit to each of the four pilot cities, plus a visit to the city of Bogotá, to observe the visionary and integrated solutions implemented in person and get to know the local populations.

DAY 1

On the **first day of the General Assembly**, the Nitra team hosted the meeting in the wonderful location of the **Faculty of Agriculture in Nitra, in a building called "UFO"**. During the morning, the pilot cities gave presentations on the **visionary and integrated solutions** being deployed in each of their locations, while the afternoon saw the turn of some of the project partners, on topics such as **behavioural games and scientific dissemination, among others**.

The day closed with a workshop managed by Tesseract that involved not only the cities, which had the opportunity to discuss and compare ideas on a number of topics, but also the perspectives of the project partners.

DAY 2

For the second day of the General Assembly, the location chosen was **the Nitra Synagogue**. Before WWII, one third of Nitra's population was Jewish, whereas now this number has decreased. The morning of the second day saw more presentations from project partners, including on **mindset change, transition pathways, and environmental monitoring**.

In the afternoon, partner **Bridge for Billions** organised a workshop during which all the partners had the chance to get to know the entrepreneurs who took part in the incubation programme.

DAY 3 AND 4

Days three and four of the trip to Nitra were focused on the Nitra cross site visit, featuring tours of the **Martinský vrch complex, the city park, Hidepark cultural and community centre and Dražovce neighbourhood**, as well as the **visionary and integrated solutions deployed in the city and locations for future solutions**. Meetings and discussions with the Nitra IN-HUB and representatives of the **Dražovce neighbourhood** were also held, along with a creative workshop focused on the testing of visionary and integrated solutions.
