EXECUTIVE SUMMARY

This document is an actualised version of the **initial Data Management Plan (DMP)** provided in M6 (D9.2, February 2021) and the **mid-term DMP (D9.5, August 2022)**. The present deliverable **D9.8 Final Data Management Plan** is part of the framework of **WP9 Project Management and Coordination** (Task 9.5 Ethics and Data Management) of the IN-HABIT Project under Grant Agreement No. 869227. The aim of the Data Management Plan is to analyse the main elements of the **Data Management Policy** (IEC 62.531) used in the IN-HABIT project, to characterise the nature of the produced research data, provide support to project partners and assure the standardisation of data and their availability in a scientific repository (i.e., Zenodo).

As part of the **Open Research Data Pilot**, IN-HABIT takes measures to ensure open access to the data underlying scientific publications, while following the **FAIR** principles to make data Findable, Accessible, Interoperable and Reusable.

The **Data Management Plan** includes:

The DMP is a living document that evolved during the project's lifetime (the final update being the present document, submitted at M60, August 2025) based on project evolution and periodical Steering Committee and General Assembly decisions, reflecting significant changes. Each time the document is updated, all partners are duly informed.
